Fee shifting in patent litigation has been a hot topic in recent years. In *Octane Fitness v. ICON* and *Highmark v. Allcare*, the Supreme Court made it easier to shift fees under 35 U.S.C. § 285, which allows courts to award reasonable attorney’s fees to prevailing parties in patent cases. Moreover, several bills have been introduced in Congress since 2013 that would expand courts’ power beyond the parameters of § 285. Various aspects of these proposals have been heavily debated, including whether fee shifting should be mandatory or discretionary, how to recover fees from the “real party in interest,” and whether to adopt a one-way or two-way fee shifting scheme.

These sort of design choices regarding a fee shifting regime are not simply about who should pay for patent litigation. Fee shifting schemes also provide a roadmap from lawmakers about whether and how litigation ought to proceed. Fee shifting regimes, in other words, are used to influence litigation conduct. Thus, if Congress is going to alter the fee shifting landscape for patent litigation, it must make careful choices in order to incentivize certain types of patent disputes, while simultaneously discouraging others.

This Article does not advocate for a new fee shifting regime for patent litigation, nor does it endeavor to design one. Instead, it focuses on one narrow but important question about fee shifting in patent cases that has received surprisingly little attention: whether prevailing parties should be able to recover attorney’s fees incurred for litigation before the Patent Trial and Appeal Board (PTAB)—the administrative tribunal of the U.S. Patent & Trademark Office that was created by the America Invents Act (AIA). With the steep rise in both PTAB proceedings (post-AIA) and fee motions (post-*Octane/Highmark*), district courts are bound to face this question more frequently. While the U.S. Court of Appeals for the Federal Circuit has allowed for the recovery of such fees in the past, the Federal Circuit’s analysis was flawed in light of Supreme Court precedent. Thus, this Article proposes that Congress enact legislation allowing parties who prevail at the PTAB to recover their attorney’s fees.

**Conclusion**
Introduction

Patent litigation is notoriously expensive. Although this sentiment has become somewhat of a cliché, it is nonetheless true. Depending on the stakes, the median costs for patent litigation range from $600,000 (for suits worth less than $1 million) to just under $2 million (for suits worth $10 to $25 million). Expert witness fees, document management and production, and technology-related demonstratives all contribute to the expense of patent litigation. But most of the money spent to adjudicate patent disputes is for attorney’s fees.

Acknowledging the high cost of patent litigation, Congress created faster and less expensive administrative procedures for challenging patents pursuant to the America Invents Act (AIA) of 2011—the most comprehensive patent reform legislation in fifty years. These new post-grant proceedings are adjudicated at the U.S. Patent and Trademark Office (PTO) by the Patent Trial and Appeal Board (PTAB), a newly-established tribunal of administrative patent judges. These administrative proceedings have been far more popular than anyone anticipated with thousands of petitions for review filed since their implementation in 2012.

Another way litigants and courts have attempted to address the high cost of patent litigation is through fee shifting. Most civil litigation in the United States is governed by the “American Rule,” meaning that each party pays his own attorney’s fees. Since the 1940s, however, the Patent Act has allowed courts to award fees to prevailing patent litigants. Yet, for at least two reasons, fee shifting in patent cases has been relatively rare over the past half century. First, the patent fee shifting provision only provides for fees in “exceptional” cases. Second, the United States Court of Appeals for the Federal Circuit—the court with exclusive appellate jurisdiction over patent cases—interpreted “exceptional” very narrowly, making fee awards even harder to come by.

In recent years, the landscape for fee shifting in patent cases has started to change. The U.S. Supreme Court decided two cases in 2014,
Octane Fitness v. ICON and Highmark v. Allcare, that make it easier to shift fees under 35 U.S.C. § 285. While it’s too early to know the full impact of Octane and Highmark, early empirical evidence shows an increase in fee motions being filed and granted. What is more, there are numerous legislative proposals to broaden fee shifting in patent cases even further. To be sure, those bills have been stalled on Capitol Hill for some time, but there are indications that patent reform may be back on the table before long.

This confluence of events—meaning the passage of the AIA, the dramatic rise in litigants’ use of PTO administrative proceedings, the decisions in Octane and Highmark, and Congress’s focus on fee-shifting in patent cases—makes it likely that courts will more frequently confront an important question about fee shifting that has received surprisingly little attention. That question is whether § 285, or the new fee shifting statutes proposed in Congress, permit prevailing parties in patent cases to recover attorney’s fees incurred for proceedings before the PTO. While the Federal Circuit addressed this question almost three decades ago in PPG Indus., Inc. v. Celanese Polymer Specialties Co., Inc., the court’s analysis was flawed in light of Supreme Court precedent. Thus, this Article calls on the judiciary to revisit PPG, and urges Congress to explicitly resolve this issue in any new patent fee-shifting legislation under consideration.

This Article proceeds in four Parts. Part I compares and contrasts the different fee shifting regimes used in civil litigation in the United States today, and weighs their costs and benefits. Part II turns to fee shifting in patent cases, and discusses the history of awarding attorney’s fees, as well as recent developments in this area from both the judicial and legislative branches. Part III summarizes the case law addressing the question whether fees incurred for work before an administrative tribunal are encompassed by fee shifting provisions. Part III then argues that the Supreme Court has adopted a clear framework for analyzing such questions, but that the Federal Circuit failed to apply this well-established precedent when it decided PPG. Finally, Part IV recommends that either the Federal Circuit sitting en banc or the Supreme Court reconsider PPG, and proposes that Congress enact legislation allowing for the recovery of attorney’s fees for work before the PTAB.

I. Civil Litigation and Fee Shifting

The question of who pays attorney’s fees in civil litigation is about more than money. Fee shifting regimes are designed to shape litigation conduct, for example by incentivizing certain types of lawsuits and

disincentivizing others. The three primary fee shifting regimes utilized in the United States today—no-way fee shifting, one-way fee shifting, and two-way fee shifting—reflect different beliefs about the purpose and value of litigation in our society.\textsuperscript{18} The popularity of these fee systems has ebbed and flowed as attitudes about civil litigation have changed over time.

A. No-Way Fee Shifting

The norm in the United States is that all litigants, win or lose, pay their own attorney’s fees.\textsuperscript{19} A no-way fee shifting regime, or the “American Rule” as it is often called, has been the general practice in this country for more than two hundred years.\textsuperscript{20} It is hard to say why no-way fee shifting took root in early America, but scholars have advanced various theories. Some contend the American Rule evolved from the popular view of the solitary folk-hero fighting for his rights.\textsuperscript{21} Others suggest that this regime—a sharp departure from the British tradition of awarding fees to prevailing parties—developed because of the anti-British sentiment that pervaded post-Revolutionary America.\textsuperscript{22} Still others claim it was America’s disdain for lawyers that led to no-way fee shifting: colonists distrusted lawyers and thus rejected a rule that allowed for the recovery of fees.\textsuperscript{23}

Whatever the original purpose of no-way fee shifting, today the rule is justified primarily as a means for increasing access to justice.\textsuperscript{24} The risk of having to pay an opponent’s attorney’s fees may deter wronged parties from filing meritorious lawsuits.\textsuperscript{25} This risk is particularly acute for low-income litigants whose injuries would likely go unremedied in a system that shifts fees.\textsuperscript{26} The American Rule, in other words, “reflects a certain wealth consciousness” by helping to level the playing field between litigants of modest means and the wealthy, large corporations they are usually suing.\textsuperscript{27}

\textsuperscript{27} Sherman, supra note 24, at 1865.
The unpredictability of civil litigation provides another justification for our modern system of no-way fee shifting. Estimating the probability of success in a lawsuit can be difficult, so litigants shouldn’t be punished for merely asserting a claim or defense. This is especially true for cases raising novel legal theories and other complex questions. From a societal perspective, novel claims are fundamental because they allow the law to evolve, adapt, and modernize—for example, with respect to new technologies—often at a much faster pace than if lawmaking was left to the legislative body. Thus, the American Rule facilitates litigation, including litigation of novel legal issues, by eliminating the risk of having to pay the other side’s attorney’s fees.

The American Rule serves important public interests, namely by making courts more accessible to the less fortunate and creating legal precedent that develops the law. In point of fact, Justice Harlan has described our fee shifting regime as “an element of due process.” While some may be unwilling to go that far, the American Rule is unquestionably a deeply-entrenched feature of our jurisprudence.

That does not mean, however, that the American Rule is beyond reproach; indeed, it has been the subject of much criticism. For one, critics argue that no-way fee systems fail to make prevailing parties whole. Not only does this strike many as fundamentally unfair, it contradicts basic principles of remedies law. Commentators also take issue with the American Rule for discouraging plaintiffs with low-value claims from

28 Fleischmann, 386 U.S. at 718 (“[S]ince litigation is at best uncertain one should not be penalized for merely defending or prosecuting a lawsuit….”).

37 Mayer & Stix, supra note 36, at 426 (“No party in a breach of contract situation…should be left following the breach with less in hand than he would have had if his adversary had lived up to his bargain. But…this is precisely what happens under the present cost and damage structure when litigation occurs.”); Rowe, supra note 18, at 657 (“Undeniably, the American rule’s effect of reducing a successful plaintiff’s recovery by the amount of his lawyer’s fee conflicts with the make-whole idea underlying much of the law of remedies.”).
bringing suit since any recovery would be swallowed by attorney’s fees.\(^{38}\) This is most problematic for impoverished plaintiffs who may not be able to retain contingency-fee lawyers for cases with little monetary value.\(^{39}\)

On the other hand, the American Rule has been impugned for failing to deter—and even encouraging—frivolous litigation.\(^{40}\) Because defendants have to pay their own fees, even when they win on the merits, settling groundless claims is often less expensive than litigating the case to judgment. In this way, the argument goes, the American Rule functions as a sort of “legalized form of blackmail” that clogs our courts and undermines our justice system.\(^{41}\)

These shortcomings of the American Rule have led legislatures and courts to implement different types of fee-shifting regimes from time to time. One-way fee shifting, by far the more common exception, awards fees only to prevailing plaintiffs to address the underenforcement of socially-valuable claims, while two-way fee shifting aims to make prevailing parties whole and discourages frivolous litigation.

\section*{B. One-Way Fee Shifting}

For over a century, exceptions to the American Rule were few and far between.\(^{42}\) Congress crafted limited exceptions for antitrust, securities, copyright, and—most relevant to this article—patent cases.\(^{43}\) Courts, relying on their equitable powers, allowed for the recovery of attorney’s fees when the losing party acted in bad faith,\(^{44}\) or when the litigation benefitted the public, such as cases involving a common fund.\(^{45}\) Because these exceptions were relatively rare, they received little attention from courts and commentators.

That changed in the second half of the twentieth century with the emergence of public law, or public impact, litigation.\(^{46}\) Public law

\end{footnotesize}
litigation began with structural challenges by public interest groups to segregated schools and other government institutions. But soon the pool of challengers expanded to individuals who were incentivized by lawmakers to privately enforce public laws. These so-called “private attorney generals” were incentivized, of course, by the prospect of recovering damages in many cases. Even more important were the one-way fee shifting provisions included in civil rights and environmental legislation that entitled only prevailing plaintiffs to attorney’s fees.

The idea behind one-way fee shifting is relatively straightforward. Certain areas of substantive law—civil rights, environmental, and consumer protection, for example—are socially valuable, and so enforcement is particularly important. While government agencies police and enforce such laws, limited resources and personnel mean that some violators go unpunished. One alternative is for private citizens (and their lawyers) to step in and fill that gap. But for that to work, the potential benefits of litigation must outweigh its costs. Various means could be used in an attempt to tip the scales in favor of litigation. Lawmakers could provide for enhanced damages, lower the plaintiff’s burden of proof, increase the availability of class relief, or allow third parties to finance litigation. For the most part, though, legislatures have opted instead for fee-shifting rules that advantage plaintiffs.

By the 1990s, there were over 2,000 fee shifting statutes in the United States, the vast majority of which operate one way in favor of plaintiffs. The general consensus is that these laws have worked as intended, meaning they have improved—although certainly not

perfected—access to justice for plaintiffs.\(^55\) Indeed, some commentators believe that one-way fee shifting works too well in that it facilitates frivolous claims along with meritorious ones.\(^56\) As a result, defendants subject to one-way fee-shifting provisions are often forced to settle meritless suits because litigating is just too risky.\(^57\)

On the flip side, one-way fee shifting is criticized for having a dampering effect on settlement. Simply put, the rule may discourage settlement because plaintiffs have little to lose and much to gain from litigating to judgment.\(^58\) For this criticism to be persuasive, we must suppose that settlement is the ultimate goal; that it’s always the best way to resolve litigation. Yet, in some cases—particularly the type of public law litigation where one-way fee shifting is used—adjudicating to final judgment is a better solution than settling.\(^59\) Thus, by discouraging settlement, one-way fee shifting is arguably working exactly how intended.

As quickly as support for one-way fee shifting grew in the 1960s and 1970s, the momentum faded by the end of the twentieth century. Where lawmakers, courts, and the public once favored fee shifting that spurs litigation,\(^60\) the focus moved to fee shifting that hampers litigation. There was supposedly a “litigation explosion” plaguing our judicial system that two-way fee shifting would help fix.\(^61\)

\(^{55}\) See Evans v. Jeff D., 475 U.S. 717, 741 (1986) (finding that “the Fees Act has given the victims of civil rights violations a powerful weapon that improves their ability to employ counsel, to obtain access to the courts, and thereafter to vindicate their rights by means of settlement or trial”); Jack B. Weinstein, Adjudicative Justice in A Diverse Mass Society, 8 J.L. & POL’y 385, 390 (2000) (“There are many grounds for pride in our successes in opening up the adjudication system to all…including…statutes…providing for fee shifting,…”). But see Issachar Rosen-Zvi, Just Fee Shifting, 37 FLA. ST. U. L. REV. 717, 721-22 (2010) (“The overall impact of…fee-shifting statutes on access to justice has been limited at best….=”).

\(^{57}\) See, e.g., Coast Bank v. Holmes, 19 Cal. App. 3d 581, 596-97 (Ct. App. 1971) (“One-sided attorney’s fees clauses can thus be used as instruments of oppression to force settlements of dubious or unmeritorious claims.”).

\(^{60}\) See, e.g., Issachar Rosen-Zvi, Just Fee Shifting, 37 FLA. ST. U. L. REV. 717, 760 (2010) (scholars commonly argue that one-way fee shifting “increase[s] the overall number of actions filed”). But see Richard A. Posner, ECONOMIC ANALYSIS OF LAW 585, 593 (6th ed. 2003) (“[O]ne-way indemnity may not even generate more litigation than the American (no-indemnity) rule does.”).

C. Two-Way Fee Shifting

The claim that the U.S. justice system was in crisis and was suffering from a litigation explosion became ubiquitous by the late 1980s. Politicians, big companies, and the popular media subscribed to the notion that overly litigious plaintiffs (and their lawyers) were burdening our courts and needed to be reined in. Though little empirical evidence supported these allegations, the Bush administration joined the chorus and called for litigation reform. To this end, then-Vice President Dan Quayle was appointed to lead the Council on Competitiveness, an organization committed to protecting American business interests.

After conducting hearings, the Quayle Council published its Agenda for Civil Justice Reform in 1991. Among its many proposals was the recommendation that two-way fee shifting, or the English Rule, be implemented in federal diversity suits. A “loser pays” rule arguably reduces the number of baseless lawsuits, encourages meritorious ones, and makes prevailing parties whole. Moreover, parties subject to two-way fee shifting are less likely to engage in excessive discovery and motion practice.

This movement toward the English system gained some traction in the 1990s. Not only was the public’s interest in the topic piqued, lawmakers gave it serious consideration too. A loser pays bill passed the House of Representatives, Congress enacted the Private Securities Litigation Reform Act with a two-way fee shifting provision, and a few states adopted loser pays statutes for certain types of civil suits. With time, however, the fervor for fee shifting waned due in part to the Clinton Administration’s opposition to loser pay rules as “tilting the legal playing field dramatically to the disadvantage of consumers and middle-

74 Olson & Bernstein, supra note 69, at 1175-80.
class citizens.”75 This is especially true for those plaintiffs relying on contingency fee arrangements.76

For the past two decades, civil litigation reform has taken a different course. The judiciary—the Supreme Court in particular—has addressed topics ranging from pleading standards to class certification to arbitration clauses to personal jurisdiction.77 The Court’s decisions on all these matters are considered “pro-defendant,” in that they make it more difficult for plaintiffs to sue.78 So while widespread two-way fee shifting failed to take root in the U.S., the landscape of our civil litigation system has been transformed nonetheless.

Despite these substantial changes, there have been calls for further reform with respect to patent litigation.79 Similar to the rhetoric of the late twentieth century, critics say we have a patent litigation “crisis” or “explosion” on our hands.80 They claim that this crisis has been caused primarily by patent assertion entities (PAEs), more pejoratively known as “patent trolls,” which are companies that own and enforce patents, but do not practice them.81 PAEs—much like the supposedly overly-litigious plaintiffs of the early 1990s—rely heavily on contingency fee arrangements.82 Thus, numerous bills have been introduced in Congress to overhaul the way patent cases are litigated.83 Although the Patent Act already allows for fee-shifting in exceptional cases,84 many of these bills feature robust fee shifting provisions.

II. Fee Shifting in Patent Cases

Two-way fee shifting is rare in the United States, yet has been available in patent cases for the past seventy years. That said, Congress intended fee shifting to be invoked only in a small subset of patent cases. Courts have heeded that advice, limiting fee shifting in some circumstances perhaps even more than Congress had expected. The questions now facing Congress are whether the time has come to re-tool the patent fee shifting statute to make it broader and, if so, what that new statute should look like.

76 Mallor, supra note 23, at 618 (“Even a litigant who had a contingent fee arrangement with his own attorney would be deterred from filing suit; this would cancel the benefit of the contingency fee as a means of financing litigation for litigants of modest means.”).
78 Id. at 472-74.

83 Gugliuzza, supra note 79, at 281.
A. History of § 285

Historically, patent cases were governed by the American Rule like most other types of civil suits. That changed in 1946 when Congress amended the Patent Act to provide for two-way fee shifting. The purpose of this new law was two-fold. First, Congress believed it would deter willful infringement “by anyone thinking that all he would be required to pay if he loses the suit would be a royalty.” Second, two-way fee shifting would “enable the court to prevent a gross injustice to an alleged infringer.”

The original patent fee shifting statute, then-codified at 35 U.S.C. § 70, stated that a court “may in its discretion award reasonable attorney’s fees to the prevailing party upon the entry of judgment in any patent case.” On its face, the statute lacked guidance about when to award fees. But the legislative history and cases interpreting § 70 make clear that fee shifting was reserved for “extraordinary circumstances,” such as cases involving inequitable conduct or vexatious litigation.

The Patent Act of 1952 amended the fee shifting statute and recodified it at 35 U.S.C. § 285, where it remains in the same form today. Section 285, in its entirety, provides that “[t]he court in exceptional cases may award reasonable attorney fees to the prevailing party.” While the language differed from the 1946 version, Congress did not intend to change the substance of the statute. Instead, this was a clarifying amendment to “express[s] the intention of the [1946] statute as shown by its legislative history and as interpreted by the courts.” Thus, in the decades after recodification—just as in the years before—district courts interpreted and applied the patent fee shifting statute in a discretionary manner, considering the totality of the circumstances and deciding whether a particular case was “exceptional” to warrant fees.

Although the 1952 Act did not change the way courts approached fee shifting, it overhauled many other features of the patent system. The Act strengthened patent owners’ rights, ultimately leading to more applications at the PTO and more issued patents. At the same time,
courts were invalidating patents at very high rates, and the circuits were sharply divided on many substantive patent law doctrines. This fracture among the courts created a sense of unfairness, generated instability, and promoted forum shopping in patent cases. In an effort to address these deficiencies, Congress created the U.S. Court of Appeals for the Federal Circuit in 1982.

B. The Federal Circuit’s Approach to Fee Shifting

The primary purpose of the Federal Circuit was to bring greater uniformity to patent law. The idea was that a “single court of appeals for patent cases [would] promote certainty,” and so the Federal Circuit was granted exclusive appellate jurisdiction over most patent-related cases. Commentators generally agree that the Federal Circuit has taken this congressional mandate to heart, and patent doctrine has become more uniform over the past three decades.

One way the Federal Circuit has accomplished this uniformity goal is by preferring bright-line rules to more flexible standards. There is a rich literature discussing this trend in the Federal Circuit and the impact it has had on patent law. The court adopted such bright-line rules for patentable subject matter, obviousness, declaratory judgment jurisdiction, and permanent injunctions, to name just a few.

The Federal Circuit’s proclivity toward bright-line rules is similarly apparent in its fee shifting jurisprudence. As noted above, for a long time after the 1952 Act, district courts decided exceptionalism for fee shifting purposes under a totality of the circumstances test. But that...
changed in 2005 when the Federal Circuit rejected this well-established, malleable standard in *Brooks Furniture Mfg., Inc. v. Dutailier Int'l, Inc.*¹⁰⁷

The accused infringer in *Brooks Furniture* sought a declaratory judgment of noninfringement and invalidity with respect to a design patent for rocking chair trim.¹⁰⁸ The district court granted summary judgment of noninfringement, determined the case was exceptional under § 285, and awarded attorney’s fees.¹⁰⁹ The court awarded fees because it believed the patent owner’s litigation tactics were inappropriate and its infringement position was frivolous.¹¹⁰

The Federal Circuit reversed on appeal and announced a new rule for deciding whether a case is exceptional under § 285. Cases are exceptional, the court explained, in only two circumstances.¹¹¹ First, “when there has been some material inappropriate conduct related to the matter in litigation.”¹¹² Such conduct might include willful infringement, fraud or inequitable conduct in procuring the patent, misconduct during litigation, vexatious or unjustified litigation, or conduct that violates Federal Rule of Civil Procedure 11.¹¹³

Second, a case may be deemed exceptional if the litigation was brought in subjective bad faith and the litigation is objectively baseless. A prevailing defendant must prove, in other words, that the plaintiff actually knew the litigation was objectively baseless.¹¹⁴ And the defendant can only do that, the Federal Circuit pronounced, with clear and convincing evidence because “[t]here is a presumption that the assertion of infringement of a duly granted patent is made in good faith.”¹¹⁵ Applying this new test, the court reversed the fee award in *Brooks Furniture* because the accused infringer could not prove by clear and convincing evidence that the patent owner knew its case was objectively baseless.¹¹⁶

Like in *Brooks Furniture*, prevailing defendants in patent cases generally have struggled to recover attorney’s fees.¹¹⁷ A recent study by Saurabh Vishnubhakat analyzed over 200 fee awards from 2003-2013 and found that only 29% of the fee awards that are granted go to defendants, with 71% going to plaintiffs.¹¹⁸ Notably, however, Vishnubhakat found that in the rare instances when defendants were awarded fees, the median

¹¹⁸ Id.
amounts were much higher than for plaintiffs.\textsuperscript{119} The study further concludes that fee awards vary by district and based on the underlying technology.\textsuperscript{120}

Though difficult to prove empirically, it seems reasonable to conclude that the Federal Circuit’s bright-line rule in \textit{Brooks Furniture} is one of the reasons that fee awards for defendants have been so elusive. In some cases, district courts refused to award fees because the \textit{Brooks Furniture} framework was not met,\textsuperscript{121} while in others the district court awarded fees only to be reversed by the Federal Circuit.\textsuperscript{122} As with many areas of patent law, commentators called for reform and the Supreme Court stepped in.\textsuperscript{123}

\textbf{C. The Supreme Court’s Approach to Fee Shifting}

In 2014, the Supreme Court decided two cases—\textit{Octane Fitness LLC v. ICON Health and Fitness, Inc.} and \textit{Highmark, Inc. v. Allcare Health Mgmt. Sys., Inc.}—that have turned the tide for fee shifting in patent cases. \textit{Octane} addressed the question of what makes a case “exceptional” under § 285, while \textit{Highmark} addressed the standard that appellate courts should use in reviewing fee decisions. Consistent with recent trends in the patent space,\textsuperscript{124} the Supreme Court reversed the Federal Circuit in both cases.

\textit{Octane} involved a patent dispute over an elliptical exercise machine.\textsuperscript{125} ICON, the patent owner, sued Octane for infringement in the U.S. District Court for the District of Minnesota. After prevailing on a motion for summary judgment based on noninfringement, Octane sought attorney’s fees.\textsuperscript{126} The court denied the fee motion under the \textit{Brooks Furniture} rule, finding that ICON’s claim was neither objectively baseless nor brought in subjective bad faith.\textsuperscript{127} On appeal, the Federal Circuit affirmed rejecting Octane’s argument that the \textit{Brooks Furniture} rule was “overly restrictive.”\textsuperscript{128}

The Supreme Court granted Octane’s petition for certiorari and reversed, explaining that the \textit{Brooks Furniture} framework is “unduly rigid” and “encumbers the statutory grant of discretion to district courts.”\textsuperscript{129} In reaching this conclusion, the Court focused on the plain language of § 285, which simply requires that a case be “exceptional” to warrant a fee award. Because the Patent Act does not define

  \item \textsuperscript{128} Id.
  \item \textsuperscript{129} Id.
“exceptional,” the Court ascribed the term its ordinary meaning: uncommon, rare, or not ordinary. 130

Thus, the Court held, a case is exceptional under § 285 as long as it “stands out from others with respect to the substantive strength of a party’s litigating position (considering both the governing law and the facts of the case) or the unreasonable manner in which the case was litigated.” 131 The Court went on to say that lower courts should decide exceptionalism on a case-by-case basis considering the totality of the circumstances. 132 Hence, Octane—like many other recent Supreme Court patent decisions—rejected the Federal Circuit’s bright-line rule for a more flexible standard.

Highmark, the companion case to Octane, addressed the appropriate standard of review for fee shifting decisions. Highmark, Inc., a health insurance company, filed an action in the U.S. District Court for the Northern District of Texas against Allcare Health, the owner of a patent covering “utilization review” in managed health care systems. 133 Highmark sought a declaratory judgment that Allcare’s patent was invalid, unenforceable, and not infringed, and Allcare counterclaimed for infringement. 134 The district court entered summary judgment of noninfringement in favor of Highmark.

Highmark then filed a motion for attorney’s fees under 35 U.S.C. § 285. The district court determined that the case was exceptional because Allcare engaged in “vexatious” and “deceitful” litigation conduct, and pursued infringement claims despite its own experts demonstrating that such claims lacked merit. 135 Accordingly, the district court granted the motion and awarded Highmark more than $5 million in fees. 136 On appeal, the Federal Circuit—applying a de novo standard of review—reversed the exceptional case determination with respect to one of the patent claims in issue. 137

The Supreme Court granted certiorari in Highmark and once again reversed the Federal Circuit. Relying on Octane, the Court held that the question whether a case is “exceptional” is committed to the discretion of the district court. 138 Thus, the Court explained, all aspects of the § 285 determination are reviewed on appeal for an abuse of discretion, not de novo as was the Federal Circuit’s practice. 139

Taken together, Octane and Highmark have the potential to shift the landscape of patent litigation. While it’s still too soon to understand the full impact of these cases, early studies suggest that parties are bringing fee motions at higher rates, courts are more willing to grant them, and accused infringers are more likely to recover than in the pre-Octane era. 140

Whatever changes they ultimately achieve, Octane and Highmark are probably not a panacea for the problems supposedly plaguing our patent litigation system. Consequently, reformers continue to advocate for a broader fee-shifting statute for patent cases.

D. Legislative Proposals for Fee Shifting

Congress passed the America Invents Act, the most significant overhaul to the U.S. patent system in over half a century, in 2011. Yet, less than two years later, calls for further reform began. More than a dozen bills were introduced in Congress between 2013 and 2015, many of which included fee shifting provisions. The fee provisions in these bills varied. Some were one-way awarding fees only to the accused infringer, while others were two-way allowing either prevailing party to recover. Certain of these bills targeted PAEs, while others drew no distinctions based on the identity of the parties.

This legislative effort culminated with two leading bills emerging from the House and the Senate. The Innovation Act—the House version of the bill—and the Protecting American Talent and Entrepreneurship (PATENT) Act—the Senate version of the bill—contain relatively similar fee shifting provisions. Although a detailed analysis of these provisions is beyond the scope of this Article, a few key points should be highlighted.

First, the bills are two-way, meaning a court may award fees to either a prevailing patent owner or accused infringer. Second, both bills make fee shifting mandatory unless the court finds that (1) the losing party’s position and conduct was reasonable, or (2) special circumstances (e.g., undue economic hardship) would make an award unjust. Third, the bills contemplate the joinder of interested parties to facilitate the recovery of fees. Fourth, the bills include exceptions for universities and certain technology transfer organizations. Finally, and most (finding that the number of fees motion has risen and courts are more likely to grant those motions post Octane); Mallun Yen, Fee-Shifting Before and After the Supreme Court Decisions, INSIDE COUNSEL, http://www.insidecounsel.com/2015/02/25/fee-shifting-before-and-after-the-supreme-court-de (Feb. 25, 2015) (finding that accused infringers are winning fee awards at higher rates than before Octane).

141 See, e.g., Eric Coe, Collecting Fees Still Tough After Octane, Highmark Cases, LAW 360 (Aug. 28, 2015) (discussing the limitations on fee shifting even after Octane and Highmark); Yen, supra note 139 (“reformers assert that fee-shifting won’t be truly effective without further legislation”).

144 Bernstein, supra note 1, at 1493-94.

pertinent to this Article, both bills allow for the recovery of fees incurred “in connection with a civil action.”

What neither the Innovation Act nor the PATENT Act (nor any other bill for that matter) clarifies is what it means to incur fees “in connection with a civil action.” Does that only include fees for work before the district court? Or does it also include fees for proceedings conducted before an administrative body, namely the PTO? In light of the steep rise in the use of PTO proceedings since the AIA, these are important questions to answer.

III. Fee Shifting for Administrative Proceedings

The AIA effected major changes in American patent law. Our priority system switched from a first-to-invent to first-to-file, the definition of prior art expanded, and the ability to join defendants in patent suits was restricted. Perhaps the most substantial change, however, was the creation of the Patent Trial and Appeal Board (PTAB) and various administrative proceedings for challenging patent validity at the PTO. Though the PTO conducted post-grant proceedings before the AIA, Congress designed the new proceedings—including inter partes review (IPR), post-grant review (PGR), and covered business method review (CBM)—so they would be more effective for litigants. That is to say, Congress hoped to encourage the use of PTAB proceedings as a means of streamlining and reducing the cost of patent litigation.

PTAB proceedings, it turns out, are far more popular than anyone anticipated. Between September 16, 2012 (when the AIA became effective) and June 30, 2016, 5,202 PTAB petitions were filed (4,704 IPRs, 469 CBMs, and 29 PGRs). Early data show that challengers are enjoying high rates of success at the PTAB, meaning that a significant

155 Id. § 19 at 331-33.
156 Id. §§ 6, 7, 18 at 299-316, 329-31.
157 Id. §§ 6, 18. For example, PTAB proceedings are resolved much faster than their predecessors, the estoppel provisions are more forceful, and there are additional procedural protections, including the right to discovery and an oral hearing. Id. §§ 6, 18.
159 See, e.g., Rochelle Cooper Dreyfuss, Giving the Federal Circuit A Run for Its Money: Challenging Patents in the PTAB, 91 NOTRE DAME L. REV. 235, 251 (2015) (“[T]hese statistics speak loudly about the public’s eagerness and ability to use these procedures to ‘weed out’ bad patents...”).
percentage of patent claims have been cancelled. There is also evidence that the vast majority of PTAB proceedings involve parallel district court litigation. The popularity of these proceedings has led some critics to refer to the PTAB as a “death squad” and “killing field.” Other commentators claim the PTAB is simply doing what Congress intended: eliminating bad patents.

Without wading into this debate, what’s clear is that patent owners and accused infringers alike are expending significant resources, including attorney’s fees, on PTAB proceedings. The median cost of IPR, for example, is $275,000 through the PTAB hearing or $350,000 if appealed to the Federal Circuit. So, if a prevailing party in a patent litigation is entitled to recover reasonable expenses and fees, does that include fees for work before the PTO? Notably, this question is not one of first impression for the Federal Circuit, as the court addressed it almost three decades ago in *PPG Indus., Inc. v. Celanese Polymer Specialties Co., Inc.* in the context of pre-AIA administrative proceedings. The decision in *PPG*, which I argue is flawed, is explored below in Subsection C. Before addressing *PPG*, however, this Part provides a summary of the Supreme Court’s and other Circuit Courts’ jurisprudence on fee shifting for administrative proceedings outside of the patent context.

A. Supreme Court Jurisprudence

The 1960s and 1970s witnessed a substantial expansion of the administrative state with the creation of agencies like the Equal Employment Opportunity Commission (EEOC) and the Environmental Protection Agency (EPA), among many others. Concomitantly, Congress was enacting civil rights and environmental legislation that

---

161 Love & Ambwani, supra note 151, at 101-02. A more recent study shows that, since 2012, the rate at which the PTAB is invalidating claims has slowly and consistently declined. Saurabh Vishnubhakat, Arti K. Rai, & Jay P. Kesavan, *Strategic Decision Making in Dual PTAB and District Court Proceedings*, 31 BERKELEY TECH L.J. 45, 78 (2016).

162 Love & Ambwani, supra note 151, at 103 (finding that in 80% of IPRs the challenged patent was also asserted in litigation between petitioner and respondent); Vishnubhakat, et al., supra note 161, at 69 (finding that about 87.6% of IPR- and CBM-challenged patents are also being litigated in federal court).

165 See Ryan Davis, *PTAB’s “Death Squad” Label Not Totally Off-Base, Chief Says*, LAW 360 (Aug. 14, 2014) (quoting the former Chief Judge of the PTAB, James Smith, as saying that if the PTAB was not “doing some ‘death squadding,’ [it] would not be doing what the [AIA] calls on [the PTAB] to do”); Dreyfuss, supra note 158, at 255 (saying that many claims cancelled by the PTAB “deserve to die”).

167 *PPG Indus., Inc. v. Celanese Polymer Specialties Co.*, 840 F.2d 1565, 1567 (Fed. Cir. 1988).

included fee shifting provisions to encourage enforcement of these new rights.\textsuperscript{169} It comes as no surprise, then, that courts soon faced the question whether prevailing parties—absent explicit guidance from Congress—may recover attorney’s fees for work performed before administrative tribunals.

1. Fee Shifting in Civil Rights Cases

Beginning in 1980, the Supreme Court decided a trilogy of cases addressing this question in the civil rights context. The first case, \textit{New York Gaslight Club, Inc. v. Carey},\textsuperscript{170} involved a plaintiff who claimed she was denied a position as a cocktail waitress because of her race.\textsuperscript{171} As required by Title VII of the Civil Rights Act, the plaintiff Carey filed a complaint with the EEOC, and the EEOC referred her complaint to the New York State Division of Human Rights (“Division”).\textsuperscript{172} The Division found probable cause that Carey had been unlawfully discriminated against and, after a hearing, ordered New York Gaslight Club (“Club”) to offer her employment and pay back wages.\textsuperscript{173}

While the Club appealed the Division’s decision, Carey pursued her EEOC charge. Relying largely on the Division’s findings, the EEOC also found probable cause and issued Carey a right to sue letter.\textsuperscript{174} Carey then filed suit under Title VII in federal district court in New York seeking damages, injunctive relief, and attorney’s fees.\textsuperscript{175} Soon after filing the federal action, the Division’s decision was affirmed on appeal and the Club agreed to comply with the Division’s order.\textsuperscript{176} Thus, the only issue remaining for the court was Carey’s request for attorney’s fees, the vast majority of which were incurred for work before the Division and EEOC.\textsuperscript{177} The district court refused to award Carey fees, the Second Circuit reversed, and the Supreme Court granted certiorari.\textsuperscript{178}

The Supreme Court affirmed the Second Circuit holding that Carey was entitled to recover attorney’s fees incurred in connection with the administrative proceedings. The Court began its analysis with the language of the relevant fee shifting provision, section 706(k) of the Civil Rights Act of 1964. Section 706(k) provided that “\textbf{in any action or proceeding} under this title the court, in its discretion, may allow the prevailing party, other than the Commission or the United States, a reasonable attorney’s fee as part of the costs.”\textsuperscript{179} The fact that the statute referred not only to “action” but to “proceeding” was critically important to the Court. “The words of § 706(k) leave little doubt that fee awards are authorized for legal work done in ‘proceedings’ other than court

\end{footnotes}
This is particularly true where, as here, the administrative proceedings in question were mandatory.\textsuperscript{181}

What is more, the \textit{Carey} Court opined, this plain language interpretation of § 706(k) is supported by the legislative history. Allowing a prevailing plaintiff like Carey to recover fees for administrative proceedings furthers the objective of § 706(k), namely to “facilitate the bringing of discrimination complaints.”\textsuperscript{182} A contrary rule would force victims of discrimination to bear the costs of mandatory administrative proceedings, which no doubt would deter the enforcement of many meritorious civil rights claims.\textsuperscript{183}

The second case in the trilogy—\textit{Webb v. Dyer County Board of Education}—presented a similar set of facts as \textit{Carey}, but involved a different statutory scheme.\textsuperscript{184} Leonard Webb, a schoolteacher, claimed he was terminated on the basis of his race and pursued administrative remedies as provided by Tennessee law. After several hearings, the Board of Education of Dyer County, Tennessee, upheld Webb’s dismissal.\textsuperscript{185} Webb then filed a federal action under 42 U.S.C. § 1983 alleging violations of civil rights laws and the constitution. The lawsuit ultimately settled with a consent order pursuant to which Webb was reinstated to his former teaching position and awarded $15,400 in damages.\textsuperscript{186} Webb subsequently filed a motion for attorney’s fees pursuant to 42 U.S.C. § 1988, seeking to recover, \textit{inter alia}, fees incurred during the administrative proceedings.\textsuperscript{187} The district court rejected Webb’s request for such fees, the Court of Appeals affirmed, and the Supreme Court granted certiorari.\textsuperscript{188}

This time, the Court refused to allow the plaintiff to recover fees for time spent in administrative proceedings. As in \textit{Carey}, the Court started with the relevant statutory language and found that § 1988, like § 706(k) of the Civil Rights Act, authorizes an award of attorney’s fees in “\textit{any action or proceeding} to enforce a provision” of this title.\textsuperscript{189} The Court nonetheless distinguished \textit{Carey} on the grounds that the mandatory nature of the state proceedings under Title VII in \textit{Carey} and the optional state proceedings pursued by plaintiff in \textit{Webb}.\textsuperscript{190}

Rev. 379391-92 (1989) (“It is evidence that the Webb majority saw a clear distinction between the mandatory nature of the state proceedings under Title VII in \textit{Carey} and the optional state proceedings pursued by plaintiff in \textit{Webb}.”).
\textsuperscript{191} \textit{Webb}, 471 U.S. at 243.
Because Webb failed to make such a showing, the district court properly denied fees.  

*North Carolina Department of Transportation v. Crest Street Community Council, Inc.* is the third case in the civil rights trilogy. In *Crest*, the plaintiff filed an administrative complaint with the U.S. Department of Transportation challenging a plan to build a federally-funded highway through a predominantly black neighborhood as violative of Title VI of the civil rights laws. The parties settled the administrative dispute, and plaintiff subsequently filed an action in federal court exclusively to recover attorney’s fees under 42 U.S.C. § 1988. The Supreme Court granted certiorari because the courts of appeal were split on the question whether such an independent action for fees is sustainable.

In a decision that has drawn significant criticism, the Court held that plaintiffs could not file a separate lawsuit under § 1988 to recover fees incurred during administrative proceedings. The Court read literally the language of § 1988, which allows for the recovery of fees for “any action or proceeding to enforce a provision of 1981, 1981a, 1982, 1983, 1985, and 1986 of this title.” Because a separate action for fees did not seek to enforce any of these laws, § 1988 was not satisfied. The Court defended this conclusion saying that it is “entirely reasonable to limit the award of attorney’s fees to those parties who, in order to obtain relief, found it necessary to file a complaint in court.” Moreover, the Court reasoned, this rule should incentivize potential civil rights defendants to resolve disputes quickly instead of risking a lawsuit and liability for attorney’s fees.

2. Fee Shifting in Environmental Cases

Around the same time the Supreme Court was deciding the civil rights trilogy, it confronted a similar issue in an environmental case, *Pennsylvania v. Delaware Valley Citizens’ Council for Clean Air*. In Delaware Valley, a public interest group filed a suit in federal court to compel the Commonwealth of Pennsylvania to implement a vehicle emission inspection and maintenance program (I/M Program) as required by the Clean Air Act (CAA). The parties entered into a consent decree pursuant to which Pennsylvania agreed to establish an I/M Program for

201 Id. at 549.
several counties in the state. However, implementation of the program did not proceed smoothly, and Delaware Valley pursued proceedings at the EPA to enforce the consent decree. As a result, the parties negotiated a new compliance schedule.

Delaware Valley then moved for attorney’s fees to recoup the money it spent during the EPA proceedings. The district court granted the motion, and the Third Circuit affirmed relying on the “useful and ordinarily necessary” standard of Webb. The Supreme Court granted certiorari, and affirmed the lower courts on this issue. In so doing, the Court began with the language of the relevant fee shifting statute, as it had in Casey and Webb. Unlike § 706(k) and § 1988, however, the fee shifting provision of the CAA, § 304(d), explicitly referred only to the “action” not to “proceedings.” But, the Court decided, the statutory language alone was not determinative of Congress’s intent. Instead, the Court looked to the legislative history of the CAA and found that it used the terms “action” and “proceedings” interchangeably.

More to the point, because § 304(d) had the same objective as §§ 706(k) and 1988—“to promote citizen enforcement of important federal policies”—their fee shifting provisions should carry the same meaning.

After addressing the plain language and legislative history of § 304(d), the Court turned to the mandatory/optional nature of the administrative proceedings. While the administrative proceedings in question were optional, the Court agreed that the work before the EPA was “useful and necessary” as contemplated by Webb. Put simply, “participation in these administrative proceedings was crucial to the vindication of Delaware Valley’s rights under the consent decree.” Accordingly, the district court did not abuse its discretion by awarding fees to the plaintiff in this case.

Piecing together the holdings of Carey, Webb, Crest, and Delaware Valley, a framework emerges for deciding whether a prevailing party may recover attorney’s fees incurred before an administrative agency. First, the plaintiff must file a lawsuit to enforce the underlying rights, not an independent action solely to recover attorney’s fees. Second, the court must determine if either the plain language of the fee shifting statute or its legislative history make clear that Congress contemplated fees for “proceedings,” not just lawsuits. Finally, the court must determine if the administrative proceedings at issue were mandatory or optional.

Whereas a prevailing party is presumptively entitled to fees for mandatory proceedings, fees for optional proceedings are only recoverable if they were both “useful and ordinarily necessary” to advance the litigation.\footnote{Id.}

\section*{B. Lower Courts’ Interpretation of Supreme Court Jurisprudence}

Fee shifting provisions are found in many different laws, and therefore lower courts have faced the question whether to include fees for work before an administrative tribunal in a number of contexts. Examples include the Handicapped Children’s Protection Act (HCPA),\footnote{See, e.g., Moore v. District of Columbia, 907 F.2d 165 (D.C. Cir. 1990) (en banc); Duane M. v. Orleans Par. Sch. Bd., 861 F.2d 115, 118 (5th Cir. 1988); Eggers v. Bullitt Cty. Sch. Dist., 854 F.2d 892, 894 (6th Cir. 1988).} the Employment Retirement Income Security Act (ERISA),\footnote{See, e.g., Rego v. Westvaco Corp., 319 F.3d 140 (4th Cir. 2003); Peterson v. Continental Cas. Co., 282 F.3d 112 (2d Cir. 2002); Cann v. Carpenters’ Pension Trust Fund for N. Cal., 989 F.2d 313 (9th Cir. 1993).} and the Age Discrimination in Employment Act (ADEA).\footnote{See, e.g., Reichman v. Bonsignore, Brignati & Mazzotta P.C., 818 F.2d 278 (2d Cir. 1987); Kennedy v. Whitehurst, 690 F.2d 951 (D.C. Cir. 1982).} Courts have generally allowed the recovery of such fees in HCPA cases,\footnote{See Davidson, supra note 211, at 444.} precluded recovery in ERISA cases,\footnote{See infra Part III.B (discussing ERISA cases in greater detail).} and split on the issue in ADEA cases.\footnote{See infra Part III.B (discussing ERISA cases in greater detail).}

A lengthy discussion of all of these cases is beyond the scope of this Article, so it addresses only the ERISA cases—which were decided most recently—in greater detail.

\textit{Cann v. Carpenters’ Pension Trust Fund for Northern California} was the first circuit decision in the ERISA context to address the question whether a prevailing party could recover attorney’s fees for administrative proceedings.\footnote{Cann v. Carpenters’ Pension Trust Fund for Northern California, 989 F.2d 313 (9th Cir. 1993).} Cann filed two federal lawsuits and pursued administrative remedies regarding his pension eligibility.\footnote{Id. at 314.} Upon settling the merits, Cann requested $51,600 in attorney’s fees, some of which were incurred during administrative proceedings.\footnote{Id. at 314-15.} Cann argued that he was entitled to recover such fees because the administrative proceedings were mandatory, i.e., exhaustion of administrative remedies was a prerequisite to filing suit.\footnote{Id. at 315} The district court nevertheless limited Cann’s recovery to fees incurred during the federal court actions.

Following the framework set out by the Supreme Court, the Ninth Circuit began by examining the plain language of the ERISA fee shifting provision.\footnote{29 U.S.C. § 1132(g)(1) (emphasis added).} It provided that “\textit{in any action} under this subchapter. . .by a participant, beneficiary, or fiduciary, the court in its discretion may allow a reasonable attorney’s fee and costs of action to either party.”\footnote{Id.} Unlike § 706(k) and § 1988, the ERISA provision mentioned only “actions” and
not “proceedings.” Therefore, the court concluded, the plain language of the statute limits awards to fees incurred in litigation in court.

But the inquiry didn’t end there. Guided by Delaware Valley, the court next considered the legislative history of ERISA. Congress’s intention was to promote “the soundness and stability of [pension] plans with respect to adequate funds to pay promised benefits.” The court believed that this objective would not be furthered, and might even be undermined, by allowing the recovery of fees for administrative proceedings. Nor, the court reasoned, was there anything else in the legislative history that “supported a nonliteral interpretation of [the term] ‘action’” in the ERISA fee shifting provision. For these reasons, the Ninth Circuit affirmed the district court’s denial of attorney’s fees.

Over the next decade, several other circuit courts faced the same question about fee shifting in ERISA cases. Starting with Anderson v. Proctor & Gamble Co., the Sixth Circuit found the reasoning in Cann persuasive and held that “ERISA does not authorize recovery of attorney’s fees for work performed during the administrative exhaustion phase of a benefits proceedings.” Likewise, in Peterson v. Continental Casualty Co., the Second Circuit limited recovery to attorney’s fees incurred in court based on the text of the ERISA fee-shifting provision. In reaching this conclusion, the Peterson court relied on dictionary definitions of “action,” the use of the term “action” in other provisions of the ERISA statute, and the decisions in Cann and Anderson.

In Rego v. Westvaco Corporation, the Fourth Circuit reached the same conclusion about fee shifting in ERISA cases. While the Rego court agreed with the rationale of its sister circuits, it offered an additional reason for not allowing the recovery of fees for administrative proceedings. Making such fees recoverable, the court suggested, would encourage parties to retain lawyers to represent them during administrative proceedings. And if lawyers were injected into this process, “it would establish a far higher degree of formality and lead to more protracted litigation in a great many cases.”

The Eighth Circuit most recently joined this line of cases in *Parke v. First Reliance Standard Life Insurance Co.* The *Parke* court found it significant that the ERISA fee shifting provision referred only to “actions,” not “proceedings.” The court also spent a good deal of time distinguishing *Delaware Valley.* Not only did the environmental legislation at issue in *Delaware Valley* have a different congressional design, the procedural posture of the case was different. As noted by the Ninth Circuit in *Cann,* the administrative proceedings in *Delaware Valley* occurred after the civil action and were necessary to enforce the already-litigated consent decree, whereas the administrative proceedings in the ERISA context pre-dated the plaintiff’s lawsuit.

In all of these ERISA cases, as well as in the HCPA and ADEA cases mentioned above, lower courts begin with the plain language of the statute and the Supreme Court’s decision in *Carey* to decide whether fees for administrative proceedings are recoverable. As discussed in the next Section, however, when the Federal Circuit confronted this question regarding fees for PTO proceedings, it skipped the first part of the analysis and focused only on the inquiry from *Webb*—whether the administrative proceedings were mandatory or optional. Because the Federal Circuit’s analysis was flawed, the question whether courts may award fees for PTO proceedings remains open.

C. Fee Shifting for PTO Proceedings

The AIA vastly expanded the ability to challenge patent validity through administrative proceedings at the PTO. But even before the AIA, various administrative proceedings were available to patent owners and other interested parties—including reissue, ex parte reexamination, and inter partes reexamination—all of which were used at times in conjunction with litigation. During this pre-AIA era, in a case called *PPG Indus., Inc. v. Celanese Polymer Specialties Co., Inc.*, the Federal Circuit addressed the question about shifting fees for work before the PTO.

1. PPG v. Celanese

PPG Industries, the owner of patents related to electrodeposition of coating compositions, sued Celanese for infringement. Celanese uncovered relevant prior art during discovery, and so PPG sought reissue

24
of the patents-in-suit. The district court stayed the federal court action pending the PTO’s resolution of the reissue proceedings, and Celanese actively participated in the reissue proceedings as a protestor and intervenor. The PTO refused to reissue PPG’s patents because the claims were obvious in light of the prior art, and because PPG engaged in inequitable conduct by intentionally withholding this prior art during the initial examination. The district court then lifted the stay, entered judgment for Celanese, and Celanese moved for attorney’s fees under 35 U.S.C. § 285. Although the district court determined the case was “exceptional” and granted the motion, it did not award the full amount Celanese requested, including approximately $275,000 for “legal services rendered before the PTO in opposing PPG’s reissue applications.” Celanese appealed, and the Federal Circuit reversed.

What’s most remarkable about the Federal Circuit’s decision in PPG is what’s missing from it, namely any reference to the text of § 285 or the Supreme Court’s decision in Carey. Instead of starting with the plain language of the relevant fee shifting provision—as Carey instructs and as all other circuit courts deciding this question have done—the Federal Circuit only discussed Webb and the designation of the reissue proceedings as mandatory or optional. The court held that, at least in this case, the reissue proceedings were mandatory because Celanese had to participate in them once PPG requested reissue. And even if considered optional, the court explained, the reissue proceedings were “useful and of a type ordinarily necessary” as contemplated in Webb. Celanese, therefore, was entitled to recover the attorney’s fees incurred during reissue proceedings before the PTO.

2. Lower Courts’ Application of PPG

Since the Federal Circuit decided PPG almost three decades ago, this fee shifting issue has garnered little attention. From time-to-time, district courts have had to decide whether to award fees for work before the PTO. In most of these reported opinions, the courts have allowed

249 Id.
250 Id. at 1567. At the time PPG was decided, third parties could participate in reissue proceedings pursuant to the “Dann Amendments.” Id. at 1568. After Congress enacted legislation providing for reexamination, it repealed the Dann Amendments. Id.

255 Id. at 1568.
256 Id. at 1568-69.
such fees with little explanation. The courts may have been relying on PPG, but that is not always clear.

With the passage of the AIA, the popularity of the new post-grant proceedings, and the rise in fee shifting motions after Octane and Highmark, courts are likely to face this issue on a much more regular basis. Indeed, a recent district court decision on the matter—Deep Sky Software, Inc. v. Southwest Airlines Co.—received a good bit of attention from various commentators and was picked up by several blogs. In Deep Sky, the plaintiff filed a patent infringement action in 2010, and soon thereafter the defendant filed a request for inter partes reexamination. The parties filed a joint motion to stay the case pending the outcome of the reexamination, which the court granted.

After the PTO cancelled all the claims of the patent, the district court lifted the stay and Southwest moved for attorney’s fees under § 285, including fees for the reexamination. The district court, which had previously determined the case was exceptional, granted the motion. In so doing, the court did not examine the text of § 285, consider its legislative history, or discuss any of the Supreme Court cases on point. Instead, relying on PPG, the court held that “the reexamination proceedings

See Deep Sky, Case No. 10-cv-1234, at 4 (“[U]nder the unique circumstances of this case, defendant may recover fees for the reexamination proceedings.”); IA Labs, 2012 WL 1565296, at *4 (“The Court accepts Nintendo’s calculation of the number of hours reasonably expended on the matter as a result of IA Labs’ baseless claim—including those related to the reexamination proceeding before the PTO.”); Howes, 761 F. Supp. 2d at 1198 (concluding that fees for reexamination proceedings were recoverable because they were “reasonably necessary to this litigation”). But see Intellect Wireless, 2015 WL 136142, at *9 (“To the extent the present fee petition contains time for work before the USPTO, such time should not be included in the fee award.”).

See infra Part IV. A related issue that at least one district court has already faced is whether prevailing parties in patent cases can be awarded the costs (as opposed to attorney’s fees) associated with PTAB proceedings. See Credit Acceptance Corp., v. Westlake Servs., LLC, CV 13-01523 SJO (MRWx), at 5-6 (C.D. Cal. Jan. 5, 2016). In Credit Acceptance, the patent owner sued for infringement, and the defendant successfully challenged the patent in CBM before the PTAB. The defendant then sought to recover costs associated with the CBM, namely $73,200 in filing fees. Id. at 5. Despite being the “prevailing party,” the district court held that defendant could not recover the CBM-related filing fees pursuant to the Central District of California’s Local Rules, which only allowed fees paid to the “Clerk” to be recoverable. Id. at 6. Since the $73,200 in fees paid to the PTO, and not the court clerk, they were not taxable costs. Id.

Id. at 2.
essentially substituted for work that would otherwise have been done before this court,” and therefore Southwest was entitled to those fees.264

Although Deep Sky involved pre-AIA administrative proceedings (i.e., inter partes reexamination), no doubt district courts will approach the fee shifting question similarly with respect to IPR, PGR, and CBM. Stated simply, courts will follow PPG and allow prevailing parties to recover fees incurred during PTO proceedings. Perhaps from a policy perspective the Federal Circuit got it right in PPG, but its legal analysis was unsound. The final Part of this Article therefore makes two suggestions for addressing this problem going forward. First, it calls on either an en banc Federal Circuit or the Supreme Court to revisit PPG, and second it urges Congress to address this matter.

IV. The Future of Fee Shifting for PTAB Proceedings

A. The Judiciary Should Revisit PPG

When the Federal Circuit decided PPG almost thirty years ago, the language of § 285 was the same as it is today: “The court in exceptional cases may award reasonable attorney fees to the prevailing party.”265 This language should have been the Federal Circuit’s starting point, as the Supreme Court explicated in Carey and its progeny.266 Of course, the “rule” announced in Carey is not unique to the circumstances of that case. It is a basic principle of statutory construction that courts begin with the language of the statute.267 The Federal Circuit itself has acknowledged this maxim time and again.268

Yet, for unexplained reasons, the PPG court skipped this critical first step when interpreting § 285. Maybe a court would choose not to address the statutory language if it were sufficiently clear. But if the statute’s language was clear, then why would the parties be litigating about it in the first place? In the end, whether such a hypothetical situation might arise in some other case is neither here nor there because the language of

264 Id. at 4. The district court did cite one other Federal Circuit case, Cent. Soya Co. v. Geo. A. Hormel & Co., 723 F.2d 1573, 1578 (Fed. Cir. 1983), for the proposition that attorney’s fees may include “those sums that the prevailing party incurs in the preparation for and performance of legal services related to the suit.” But Soya is not on point. In Soya, the question was whether courts may award expenses—such as fees for paralegals, expert witness fees, photocopying charges, travel expenses, etc.—or whether § 285 is limited to attorney’s fees. Id. at 1577-78. Soya did not address the question whether attorney’s fees for administrative proceedings are recoverable under § 285.
266 See supra Part III.A.
§ 285 is not clear—it does not unambiguously allow prevailing parties to recover fees for administrative proceedings.

To the contrary, unlike sections 706(k) and 1988 of the Civil Rights Act, § 285 makes no mention of “proceedings.” Rather, the statute says only that courts may award fees in “cases.” The term “case” is synonymous with “action,” and courts have interpreted “action” to mean a proceeding in court, not an administrative proceeding. A “case,” moreover, is defined as “a question contested before a court of justice” or “an aggregate of facts which furnishes occasion for the exercise of the jurisdiction of a court of justice.” In short, the statutory language of § 285 does not support the Federal Circuit’s conclusion in PPG that fees may be awarded for PTO proceedings.

But even where, as here, the statute is silent, courts may still award fees for administrative proceedings if that’s what Congress intended. The purpose of § 285 is “to compensate the prevailing party for its monetary outlays in the prosecution or defense of the suit.” To be sure, allowing prevailing parties in patent litigation to recover fees for PTO proceedings would be “compensatory.” However, it’s impossible to say—as the Supreme Court did in Delaware Valley—that Congress intended for these fees to be recoverable because, at the time § 285 was enacted, these PTO proceedings did not even exist.

Because neither the plain language of § 285 nor its legislative history support the recovery of fees for work before the PTO, the Federal Circuit’s legal analysis in PPG was wrong. Under the Supreme Court’s framework, the Federal Circuit never should have reached the question whether PTO proceedings are mandatory or optional because there was no explicit or implicit statutory authority for awarding fees for administrative proceedings. Thus, the Supreme Court or an en banc panel of the Federal Circuit should revisit and reverse PPG.

For all its flaws, however, the PPG decision is sound as a matter of policy, especially in light of the objectives of the AIA. One purpose of the AIA was to address the country’s bad patent problem, which Congress
believed was hampering innovation and technological advancement.\textsuperscript{277} To that end, Congress created PTAB proceedings as a quicker and less expensive alternative to district court litigation.\textsuperscript{278} Congress’s goal, in other words, was to encourage the use of PTAB proceedings to invalidate bad patents.

While various means could be used to encourage PTAB challenges, fee shifting is an important one. Simply put, when there’s a possibility of recovering attorney’s fees, parties are more likely to seek PTAB review in the first place, and more likely to pursue such challenges to a final decision.\textsuperscript{279} On the other hand, if there’s no possibility of fee shifting, parties may choose a different path. They may challenge a patent only in federal court (\textit{i.e.}, not at the PTAB), settle the case (thereby allowing an invalid patent to remain in force), or not challenge the patent at all.\textsuperscript{280}

In short, the policy underlying \textit{PPG} makes good sense because allowing prevailing parties to recoup attorney’s fees for PTAB proceedings furthers the aims of the AIA. But even assuming the Federal Circuit wanted to award fees for work at the PTAB, its hands are tied by the plain language of § 285, the statute's legislative history, and Supreme Court precedent. Accordingly, it is up to Congress to provide a legislative fix.

\textbf{B. Congress Should Allow for Recovery of PTAB Fees}

Since 2013, several bills have been introduced in Congress proposing broader fee shifting for patent cases.\textsuperscript{281} Many provisions in these bills have been the subject of significant debate, including whether fee shifting should be mandatory or discretionary, how to recover fees from the “real party in interest,” whether to adopt a one-way or two-way fee shifting scheme, the standard for fee shifting, and whether certain entities (\textit{e.g.}, universities) should be exempted from the fee shifting provisions.\textsuperscript{282} Yet, none of these bills tackles the question whether prevailing parties should be able to recover fees incurred during PTAB proceedings.

If Congress ultimately adopts one of these fee shifting bills, it should permit courts to award fees for IPR, PGR, and CBM (\textit{e.g.}, by including the word “proceedings” in the statute). Congress should also

\textsuperscript{278} See supra note 158, at 653.

\textsuperscript{279} See supra Part I (discussing how different fee shifting regimes influence litigation conduct).

\textsuperscript{280} See id.

\textsuperscript{281} See supra Part II.D (introducing various fee shifting proposals).

provide district courts some guidance on when such fees are appropriately granted. For example, district courts might be more likely to award fees for PTAB proceedings if they simplified the litigation or substituted for work that otherwise would have been done before the court. On the other hand, if PTAB proceedings were duplicative or brought for harassment purposes, recovery should not be allowed. While such decisions should be left to the discretion of the court, laying out factors in the statute for the court to consider would be helpful. To be completely upfront, I am not advocating for the passage of any of these fee shifting bills. But if Congress decides to revamp § 285, it should take that opportunity to clarify this issue about recouping administrative fees.

Even in the event Congress does not pass comprehensive fee shifting legislation, it should still address this issue. Patent litigants who employ PTAB proceedings in a way that advances the AIA’s objectives ought to recover their attorney’s fees. To allow for that, Congress would need to amend § 285—at the very least—to refer to “proceedings” in the text of the statute. Ideally, as noted above, Congress would also provide some guidance to help courts discern when fees for administrative work are warranted and when they are not.

One last suggestion is that Congress consider granting the PTAB power to award attorney’s fees to prevailing parties, as it has done for a number of other agencies. That way, parties who litigate only at the PTAB (and not also in federal court) can recover fees. This is important because, while most IPRs and CBMs involve a parallel federal court

---

283 See, e.g., Delaware Valley, 478 U.S. at 562 (“We agree that participation in these proceedings was crucial to the vindication of Delaware Valley’s rights under the consent decree and find that compensation for these activities was entirely proper and well within the ‘zone of discretion’ afforded to the District Court.”); Deep Sky Software, Inc. v. Southwest Airlines Co., Case No. 10-cv-1234-CAB (KSC), at 4 (S.D. Cal. Aug. 19, 2015).
284 See, e.g., Gregory Dolin, Dubious Patent Reform, 56 B.C. L. Rev. 881, 932-33 (2015) (discussing how parties have abused PTAB proceedings); Vishnubhakat, et al., supra note 161, at 55 (explaining that some PTAB petitions may be used for harassment and delay).
285 See Carey, 447 U.S. at 66 (“It would be anomalous to award fees to the complainant who is unsuccessful or only partially successful in obtaining state or local remedies, but to deny an award to the complainant who is successful in fulfilling Congress’ plan that federal policies be vindicated at the state or local level.”).
286 See, e.g., Fair Housing Act, 42 U.S.C. § 3612(p) (“In any administrative proceeding brought under this section, or any court proceeding arising therefrom, or any civil action under this section, the administrative law judge or the court, as the case may be, in its discretion, may allow the prevailing party, other than the United States, a reasonable attorney’s fee and costs.”) (emphasis added); Federal Mine Safety and Health Act of 1977, 30 U.S.C. § 815(c)(3) (“Whenever an order is issued sustaining the complainant’s charges under this subsection, a sum equal to the aggregate amount of all costs and expenses (including attorney’s fees) as determined by the Commission to have been reasonably incurred by the miner, applicant for employment or representative of miners for, or in connection with, the institution and prosecution of such proceedings shall be assessed against the person committing such violation.”) (emphasis added); Longshore and Harbor Workers’ Compensation Act, 33 U.S.C. §§ 928(a)-(b) (“If . . . the person seeking benefits shall thereafter have utilized the services of an attorney at law in successful prosecution of his claim, there shall be awarded . . . a reasonable attorney’s fee against the employer or carrier in an amount approved by the deputy commissioner, Board, or court, as the case may be.”) (emphasis added); Shipping Act of 1984, 46 U.S.C. § 41305(e) (authorizing the Federal Maritime Commission to award reasonable attorney fees to the prevailing party in any action brought under the act).
suit, some do not. Moreover, with respect to PGRs, there’s less likely to be parallel litigation since they must be initiated within nine months of the patent’s issuance. Allowing the PTAB to award fees would further the AIA’s objective of encouraging parties to use PTAB proceedings as a substitute for, rather than in addition to, federal court litigation. Plus, having the agency decide fee motions avoids the difficulty courts face when assessing a fee request for work conducted before a different tribunal.

Conclusion

The PTAB is transforming the way patent litigation is conducted in the United States. Where patents were once litigated solely in federal court, today the PTAB plays a key role in resolving patent disputes. While PTAB proceedings are far less expensive than federal court litigation, parties still incur significant attorney’s fees adjudicating before the PTO. These administrative fees should be recoverable by prevailing patent litigants, but Supreme Court jurisprudence makes clear that § 285’s plain language and legislative history preclude such an award. Therefore, in furtherance of the AIA’s objective of encouraging PTAB proceedings as a substitute for federal court litigation, Congress should enact legislation entitling parties who prevail at the PTAB to recover attorney’s fees.

287 See Love & Ambwani, supra note 151, at 103.
288 Vishnubhatak, supra note 116.
289 In re Cuozzo Speed Techs., LLC, 793 F.3d 1268, 1284-85 (Fed. Cir. 2015) (Newman, J., dissenting) (arguing that the PTAB was meant to serve as a “surrogate for district court litigation”); Vishnubhatak, et al., supra note 161, at 70 (noting the “intended uses of IPR and CBM review as substitutes for federal court litigation”).
290 See, e.g., PPG Indus. v. Celanese Polymer Specialties, Co., 658 F.Supp. 555, 561 (W.D. Ky. 1987) (“[I]t would be very difficult or almost impossible for the court to award those fees accurately regarding the conduct of a separate action before a different kind of tribunal.”). Notably, the PTAB did award attorney’s fees recently, albeit in a different context. In RPX Corp. v. Applications in Internet Time LLC, the PTAB ordered the patent owner to pay $13,500 in attorney’s fees as a sanction for violating a protective order. See IPR 2015-01750, 01751 & 01752. In so doing, the PTAB relied on C.F.R. § 42.12, which allows the Board to impose sanctions against a party for “misconduct.”
291 Vishnubhatak, et al., supra note 161, at 59 (“Thus far, the new AIA proceedings do appear to be substantially cheaper than district court litigation.”).
